Senior Software Engineer (Cloud Certified by AWS and Azure as Developer) Flowchart Artist (Infrastructure , Cloud, System Design), Problem Solver Experience Paths Started with Full-stack Developer (4+ years) Database Administrator and Systems Integration Developer (2+ years) Found passion in DevOps, Software System Build, Business anaylaze between clients and Developers (currently - 3+ years)

Experience

NVSSoft, UAE

SOFTWARE ENGINEER, SOFTWARE DEVELOPER & SYSTEM ADMINISTRATOR

December 2019 – Present

- Deployed integrated Document Management Systems (DMS) and Correspondence Management Systems across numerous local and federal government entities in the UAE. Key implementations include the Office of His Highness, the Ministry of Sports, the Ministry of Interior, the Federal Authority for Identity, Citizenship, Customs and Port Security, Dubai Land Department, Sharjah Police Science Academy, the Federal Supreme Court / Federal Public Prosecution, and the Ministry of Justice.
- System Integration Connected systems with different structures and programming languages.Digital Rights Management Controlled correspondence restrictions.
- System Managed the official letter correspondence system, Troubleshoot and resolve infrastructure and application issues.
- Data Analysis and Visualization Created Power BI dashboards and monitoring applications for service uptime and log analysis.
- Agile Development Worked on projects using Agile methodologies.Integration Developer Integrated UAE PASS, authentication, digital signatures, and e-seals.
- Develop a pipeline to integrate with Dataverse and SharePoint for extracting, reading, and transferring data into designated multi-storage systems, along with associated metadata.
- Design, develop, and maintain advanced ETL processes to ensure accurate and timely data integration from multiple sources, in alignment with business needs. Monitor and troubleshoot data-related issues, providing swift resolution to minimize operational disruptions.
- Created GitLab CI/CD pipeline for new projects and monitored deployments to production.
- Worked in Azure Portal with the CI Team to integrate with Tools such as Parasoft for code analysis and unit testing.
- Developed and maintain infrastructure as code (IaC) solutions using Terraform.
- Utilize AWS CloudFormation to design and implement a serverless architecture using AWS Lambda, integrated with an RDS database, to handle numerous requests from an archiving system, including printer support API Gateway, WAF Cloudflare, EC2, IAM, EBS, RDS, VPC, Route53, Migrate applications from on-premise to cloud environments.
- Developed and integrated systems for seamless communication between two platforms, and designed and implemented management systems.
- Analyze the client's infrastructure and provide best practices for migrating to cloud environments. Design a highly available architecture, deploy the application, and manage DevOps tasks, including continuous monitoring, feedback analysis, and system log review to ensure optimal server performance.
- Implemented a Terraform-based automation workflow to streamline the creation and management of GitHub repositories, AWS networking infrastructure, and AWS clusters, with configurable parameters for enhanced control and scalability.
- Experienced in migrating complex data environments (Documentum, SAP HANA, SharePoint, Oracle, and file systems) into custom, internally developed target applications.

Micropolis, UAE

SENIOR DEVELOPER

August 2018 – November 2019

- Develop Sanad for management hospitality with archive file of patients.International Relation Department make connection between diverse department in centralized location to management employees and events

inside company.

- Develop in Dubai Municipality Integration with payment portal (ERAD System)
- Develop Al Mamzar Park Management for management booking chalet and management parks and events connected to payment service and active directory, frontend base on Angular ,HTML, CSS
- Working in Alsaafat application project as Backend developer

L One Systems, Germany

BACKEND DEVELOPER

February 2016 – 20218-08

- Work with ShaufelOnline for management garden in Germany using Cack PHP frameworks
- Integration with payment portal
- Application using MERN Stack with integrate MongoDB

Education

Damascus University

BSC IN INFORMATION TECHNOLOGY & SOFTWARE ENGINEERING

Grade: 74.25.

Skills

Frontend	React, Svelte, TypeScript
Backend	C#, Node.js, Python, Java, PHP
Mobile	swift, Expo
DevOps	Ansible, Kubernetes, Terraform
Obs/Mon	Prometheus, ELK stack, OpenTelemetry, Grafana
CI/CD	PowerShell, GitHub Actions
Cloud	Vercel, AWS, Netlify, Azure
Databases	Oracle, PostgreSQL, SQLite, Redis, MySQL, MongoDB

Stats
